

Arthur Manelas Obituary In Part

Arthur John Manelas

PELHAM, NH -- Arthur John Manelas, 71, of Pelham, NH, formerly of Lowell, MA, died Thursday, after a two year plus battle with complications suffered from a brain aneurysm in September 2012.

Born in Eptahori, Kozani, Greece on June 22nd, 1943, he was the son of Irene (Kapsouris) Manelas and the late John Arthur Manelas.

Arthur graduated college in Greece before coming to America at age 18 to seek further education in upstate NY and eventually graduated from Lowell Technological Institute (now known as U/Mass Lowell). He holds Bachelor of Science degrees in both Electrical and Mechanical Engineering.

He worked his early years as an engineer for the US space program on the Apollo 13 mission which sent the first man to the moon.

Arthur was an entrepreneur owning many businesses throughout his life. He owned and operated his Solar Engineering Company in the 1970's for which he holds 17 US patents. He was a General Contractor building many houses and neighborhoods in Lowell and Dracut, MA. The past 15 years he dedicated his life to his lifelong dream of supplying free energy to the world. He developed a system that produced more energy than it consumed. A true over unity energy device that powered his house and his home made electric car without having to be plugged in to any power source.

When he wasn't solving the world's energy problems, he enjoyed being with his family and especially enjoyed attending his grandchildren's activities from hockey, baseball and lacrosse to dance and cheerleading competitions.

He was a lifelong member of the Transfiguration Greek Orthodox Church in Lowell.

Arthur also enjoyed restoring and driving classic American

muscle cars. He restored over 50 1957 Chevy Bel Airs as well as numerous Camaros, Chevelles and Corvettes.
